

Aviation Campus

SO MUCH TO LEARN. Maintenance training began in January with the fourth-year students attending classes covering AIRCRAFT ELECTRICAL SYSTEMS, CONTROL SURFACE RIGGING, and AIRCRAFT INSPECTION. The majority of Wayne's classroom instruction focused on ELECTRICAL GENERATION, and distribution for Cessna aircraft. Shop instruction included various projects for inspection on these systems, and MAKING TOOLS FOR CABLE RIGGING and INSPECTION.

As of March, I am glad to report my daily responsibilities concerning teaching and tool calibration are once again located in one hangar! This comes after a year spent wading through the county/state approval process for the internet and network connections in this third hangar that Moody now occupies.

AND
TOOL FOR INSPECTION MADE
AS A SHOP PROJECT**

The fifth year students are continuing to review topics for their post-graduation Technical Evaluation with a mission organization. It typically takes a full year for all of the Fifth Years students to cycle through these important reviews.

Alfred and Lance are shown here reviewing engine ignition system inspection and maintenance. Also pictured is a student tool project used for timing the ignition system.

Wayne & Denise
MILLER
AVIATION MISSIONARIES

OUR FAMILY lives in Spokane, WA where Wayne is an Aircraft Maintenance Instructor at Moody Bible Institute's Aviation School. We are full time support missionaries on loan through Proclaim Aviation Ministries.

MOODY AVIATION IS RECOGNIZED as the premier missionary pilot/mechanic training school in the U.S.. Here, **PROCLAIM AVIATION** partners with Moody helping provide staff and resources for mission aviation outreach. Through Proclaim, our family is blessed helping train future missionary pilots and mechanics.

MOODY GRADUATES transition to missionary bases overseas, where aviation is often the only way to access, connect, and sustain ministry. We are employing our passion and our skills as part of the effort reaching remote people with the Gospel.

Preparing the next generation of missionary aviators.

Family News

UPDATE ON TRAINING OPTIONS

DENISE has become friends with one of our neighbors who is a single mom. She was raised in a 'Christian' home but states that she does not want to follow Christ. Denise has had several discussions with her and feels that her heart is beginning to change. Denise babysits her son, who is close to Mercedes's age. He has also been attending AWANA with us weekly. **Please pray that she accepts Christ as her Savior.**

DENISE broke the small toe on her left foot, but we also found that **DENISE** has a partially torn rotator cuff in her left shoulder. She has decided to take the less invasive treatment with a Cortisone shot and therapy.

Please continue to pray for **DENISE'S FATHER AND MOTHER**. Butch is now in full hospice and the effects of the Alzheimer's are becoming more apparent each day.

Please pray for wisdom as **WAYNE** continues to co-teach the Wednesday evening men's group at church.

In our last newsletter we shared news concerning the closing of the Biblical Studies Campus here in Spokane. Biblical Studies students who are continuing at Moody are transferring to the Chicago campus. In an effort to keep all of the aviation students at one location, their required Bible courses will now be given by local Moody adjunct professors at the Moody Hangars. Thus, there will be an additional 80 plus students added to the student body at hangars.

A New University!

Paul tells us in several of his epistles to **BE JOYFUL** and **REMAIN STEADFAST** when encountering various trials. Looking back, I see trials as well as surprising, unexpected changes that the Lord used to prepare our family for serving Him. I believe that this is the situation for Moody Bible Institute Chicago and Spokane.

Several of the staff and faculty at the soon-to-be-closed Moody Bible Institute Spokane campus have begun the process to begin a new Christian university. State approval to begin classes has not been given, but **GREAT NORTHERN UNIVERSITY** has been placed on the state's *fast track* application process, and will hopefully be ready by early fall to offer classes. Please go to the school's web site for more information. www.greatnorthernu.org/about-us/our-journey/

THANK YOU for praying for our family as we serve at Moody Aviation.
