

AVIATION DIRECTLY IMPACTS

some 20 different people groups in Peru each year. For this growing population of road-less people, aviation is the primary access point to the Gospel.

Every fresh water well that is set up, every medical emergency flight completed, and every missionary delivered is for one purpose: to bring life through the Gospel of Christ.

SAMAIR partners with the local church and national missionaries to enable the ministries of these different organizations actively spreading the Word of God and making disciples in Peru.

DIRECT **destination**
supporting the movement of the indigenous church

01

02

03

the CHURCH

[INDIGENOUS] ministries like FAIENAP and CCB-Peru sending national missionaries and pastors serving hundreds of local churches throughout the jungles of Peru.

the MOVEMENT

[SAMAIR] the vital link in a mission effort to carry the Gospel and church-planting support to remote or less accessible areas of South America.

Providing subsidized transportation in support of leadership training of indigenous missionaries.

the DESTINATION

[FUNDED] indigenous missions & churches are young, growing, and of modest means.

Direct Destination seeks to take on the financial burden of connecting indigenous ministries by consistently funding their vital access to aviation.

“Our goal is to see the indigenous churches of Peru become the strongest, best prepared, most missional, tribal churches on the face of the planet!”
-Craig Gahagen SAMAIR Program Manager

The goal of the Direct Destination campaign is to raise \$50k annually to mobilize the national and indigenous missionaries that are working in some of the most difficult places within the Amazon jungle.
