

MINISTRY...

starts here

**DID
YOU
KNOW**

People with medically complex needs and their caregivers are one of the most *under-served* populations in rural communities.*

One of the top issues for this group is a **lack of transportation** to essential care and services.*

At any given time in the Midwest, there are over 100 active medical transport/trafficking relocation flight requests to organizing agencies each day.

*according to a 2022 study completed by Lifescape of Sioux Falls

COMPASSION PROJECT

LUKE 5:18-20

Love in action: Carrying others to essential care in Jesus name.

THE MISSION

Using Proclaim Aviation Ministries' flight staff and aircraft, we aim to donate flights for vital medical transport and relocation in trafficking scenarios, embodying the compassion of Jesus for our neighbors in need.

THE TEAM

Our team is comprised of administrative support, a flight department, and a maintenance department that is complemented by a steady influx of recently graduated mechanics and pilots specially trained in aviation ministry

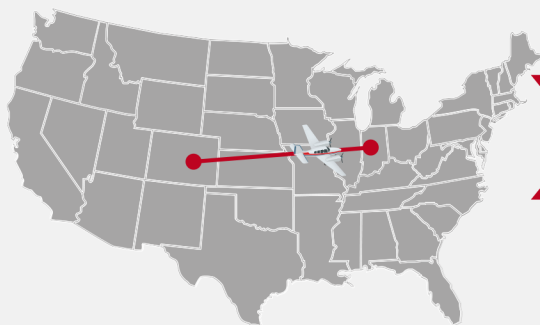

THE METHOD

Our aircraft is a twin-engine with seating capacity for six. Donated over a decade ago, it has been pivotal for training the next generation of missionary pilots and transporting individuals needing medical or relocation assistance.

WHY FLY?

1,200 MILES

DRIVING: 18 HRS
TRAIN: 20 HRS
FLYING: 4.5 HRS

"Any other mode of travel may have resulted in new injury strains and pain that might have taken years to recover...It would be difficult to overstate how grateful and thankful I am for how God used Proclaim to take what was the most stressful and dangerous time in a decade and make it as safe and smooth as it was. Thank you."
