

AVIATION.

How we sustain ministry at the ends of the earth.

By 2030, one billion people across the world will be unreachable by roads.

Global Missions rely on aviation to reach the unreachable and sustain ministry at the ends of the earth.

But the supply of highly skilled missionary aviators is not enough to meet the demand.

Our mission is to equip aviators with the skills and resources they need to fulfill their call to serve God, and to send these laborers into the harvest.

IN ONE YEAR AN AVIATION MISSION

serves 600+ organizations • logs 2.1 million miles • transports 86,262 passengers
• delivers 8 million pounds of cargo • to 1,700 remote airstrips •
saving 72,917 days of travel time • which is 301 years of ministry

SERVE.

Fulfilling the Great Commission regardless of location through training and technical ministries.

SEND.

Launching aviators into global ministry, where they will be impacting thousands annually.

did you know

Missionary aviation requires rigorous training that can take many years. It involves completing up to five years of flight and aircraft maintenance training and licensing, as well as gaining the necessary flight time and experience post-graduation. In addition, missionary aviators must pass a demanding technical evaluation, raise financial support, complete cross-cultural training and language school, often while providing for their families.

Proclaim helps expedite this process by utilizing our resources and partnerships to provide guidance and support to aspiring missionary aviators.
